

Job Description

Senior Software Engineer - Full Stack

Company: Tech Solutions Inc.

Location: Remote / Hybrid

Experience: 5+ years

About the Role:

We are looking for a Senior Software Engineer to join our growing team.

You will be responsible for designing and developing scalable web applications.

Requirements:

- 5+ years of experience in software development
- Strong proficiency in Python and JavaScript
- Experience with React.js and Node.js
- Knowledge of SQL and NoSQL databases (PostgreSQL, MongoDB)
- Experience with AWS services (EC2, S3, Lambda, RDS)
- Familiarity with Docker and Kubernetes
- Understanding of CI/CD pipelines
- Excellent problem-solving skills
- Strong communication skills

Nice to Have:

- Experience with microservices architecture
- Knowledge of GraphQL
- Experience with Agile/Scrum methodologies

Responsibilities:

- Design and develop scalable web applications
- Write clean, maintainable, and well-documented code
- Collaborate with cross-functional teams
- Participate in code reviews and mentor junior developers
- Troubleshoot and debug applications
- Contribute to architectural decisions
